PROJECTS

Advanced Prediction Of Performance Of A Student In An University Using Machine Learning Techniques

Team Leader

Description: Student's academic performance is a crucial part of an academic institution. This is considered as one of the important measures for many superior universities. Some researchers stated that the student's academic performance can be measured through learning assessment and co-curriculum activities. Though, the majority of researchers have mentioned that the student's past performances, achievements, and grades can play a vital role to predict the student's success rate
