PROFESSIONAL SUMMARY

Software Engineer with 2.5+ years of experience building enterprise-grade React applications for MES, VMS and ERP platforms. Promoted from Associate to Software Engineer within 1.25 years, with experience leading frontend delivery, reviewing code, supporting client demos and resolving production issues. Strong in React.js, JavaScript, secure MSAL authentication, RBAC and REST API integration. Expanded into full-stack development through hands-on Node.js, Express.js and MongoDB project work, including JWT authentication and application deployment.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, React Router
UI & State Management: Material UI, Tailwind CSS, Redux Toolkit, Context API
Backend: Node.js, Express.js, REST APIs, Mongoose
Database: MongoDB, PostgreSQL, pgAdmin
Authentication & Security: JWT, bcrypt, MSAL, Firebase Authentication, RBAC, Token Handling, Axios Interceptors
Tools & Platforms: Vite, Axios, Git, GitHub, npm, Swagger
Deployment & Hosting: AWS EC2, Nginx, PM2, Firebase Hosting, Vercel

WORK EXPERIENCE

Scutoid Technologies Pvt. Ltd. | Hyderabad, Telangana

Software Engineer | Aug 2025 – Present

- Lead frontend development for the ERP platform, coordinating module expansion, sprint planning, code reviews and PR approvals.
- Participate in client demos, gather requirements, resolve critical production issues and support stable enterprise releases.
- Execute legacy production data migration using PostgreSQL and pgAdmin, ensuring accurate data transfer during go-live.

Associate Software Engineer | May 2024 – Jul 2025

- Built the Visitor Management System (VMS) web application from scratch using React.js, Material UI and REST APIs, covering registration, tracking and approval workflows.
- Implemented MSAL authentication, token handling, silent refresh, Axios interceptors, protected routes and role-based UI rendering.
- Developed modular React components using Context API and Redux; improved performance by reducing re-renders and resolving cross-browser UI issues.

PROJECTS

DevTinder – Full Stack Developer Networking Application

React.js, Node.js, Express.js, MongoDB, Mongoose, Redux Toolkit, JWT, bcrypt, Tailwind CSS | *github.com/suresh-javvadi/node-js-learning-roadmap*

- Built a Tinder-style developer networking application with a React frontend and Node.js/Express backend, integrating REST APIs with MongoDB through Mongoose.
- Implemented JWT-based authentication, password hashing with bcrypt, protected API access and frontend state management using Redux Toolkit.
- Deployed on AWS EC2 with Nginx reverse-proxy configuration and PM2 process management.

Voltinos Systems – Freelance Company Website Redesign

React.js, Vercel, SEO | *voltinosystems.com*

- Rebuilt the company website using React.js and deployed it to Vercel with custom-domain setup and legacy-page cutover.
- Applied on-page SEO practices, including metadata, semantic HTML and performance optimization.

CineGPT – AI-Powered Movie Recommendation App

React.js, Redux, Firebase, TMDB API | *cinegptai.vercel.app*

- Built a movie discovery app using React.js, Redux and TMDB APIs, with prompt-based AI recommendations and Firebase Authentication.
- Deployed on Firebase Hosting with YouTube trailer playback and optimized UI state handling.

CERTIFICATIONS

Namaste JavaScript – NamasteDev | Namaste React – NamasteDev | Namaste Node.js – NamasteDev

EDUCATION

B.Tech, Computer Science Engineering – Avanthi Institute of Engineering & Technology | 2019 – 2023
